Abstract: The article focuses on mathematician Charles Peirce's analysis of the book "Critique of Judgement," by Immanuel Kant. It outlines the ways in which Peirce criticizes parts of the "Critique of Pure Reason" and the various supporting roles that certain commentators play in Kant's critique. It examines the "Critique of Judgement" showing how Kant himself renounces some of the dualisms and contradictions that Peirce finds problematic in his earlier work. It also discusses the ways in which Peirce believes that he contradicts Kant's system.
