Title: A Simple Automation of a Peircean Decision Procedure
Year: 2006
Journal: Transactions of the Charles S. Peirce Society
Volume: 42
Issue: 1
Pages: 117-131
Keywords: Alpha Graph, Decision Procedure, Existential Graph, LISP
Abstract: The article describes a simple decision procedure for the graphical sentential logic of philosopher C. S. Pierce, the system of alpha graphs. The decision procedure is then implemented by a LISP program CSProve. The article also offers examples of CSProve as it ran on a desktop computer and indicates how the program is easily adapted to parallel processing.
