Type: Manuscript

Author: Peirce, Charles Sanders

Title: On Existential Graphs as an Instrument of Logical Research

Manuscript Id: MS [R] 498

Id:

Year: 1906 [c.]

Abstract / Robin Catalogue:

Description: A. MS., notebook (Harvard Cooperative), n.p., n.d.

Evidently prepared as an address to the American Academy. CSP mentions that existential graphs were discovered by him late in 1896, but that he was practically there some fourteen years before. The graphs were not invented to serve as a calculus, but to dissect the inferential process. Two puzzles examined with a view toward testing the system of graphs. One puzzle concerns the relation of signs to minds, and of communication from one mind to another. The other puzzle concerns the composition of concepts and the nature of judgment or, antipsychologically speaking, propositions, Signs; reality; conventions of the system of existential graphs.

Keywords: Logic, Existential Graph, Real, External, Type, Token, Communication, Sign, Thought, Thinking, Semeiotic, Logical Machine

Language: English
