Term: Law of Habit

Quote: According to the universal law of habit, all vital processes whatever tend to become easier on repetition. (J. J. Murphy. *Habit and Intelligence*. 1869. Chap. XV. Vol. I. p. 169.). The nervous system is particularly susceptible to habit, and along whatever path a nervous discharge has once taken place, along that path a new discharge is the more likely to take place. It is an essential characteristic of this law that it is not absolute.
