Term: Hypothesis [as a form of reasoning]

Quote: These differences between these two scientific inferences are so great that it

seems to me essential to a right understanding of the subject that we should recognize two kinds of scientific reasoning. Induction and Hypothesis. [—] Hypothesis alone affords us any knowledge of causes and forces, and enables

us to see the why of things. [—] So that we have

Deduction Induction and Hypothesis

as three coördinate classes of reasoning.
