## Referential Relation

1903	Nomenclature and	Divisions of D	vadic Relations	CP 3.573
------	------------------	----------------	-----------------	----------

A dyadic relation proper is either such as can only have place between two subjects of different universes of discourse (as the membership of a natural person in a corporation), or is such as can subsist between two objects of the same universe. A relation of the former description may be termed a referential relation; a relation of the latter description, a rerelation.
